

Financial education that drives youth **acquisition and retention** — embedded inside your app, under your brand.

THE YOUTH BANKING CHALLENGE

Every retail bank is competing for the same customers under 25. Acquisition costs keep rising. Retention below age 25 is the weakest segment in most retail portfolios. Existing youth banking apps offer transactions but little reason for a young customer to open them more than twice a month.

The product that solves this isn't a better debit card. It's a reason to engage.

THE WHITE-LABEL OPPORTUNITY

AflaThrive licenses a structured financial education curriculum that embeds directly into your youth banking product. **Your brand. Your interface. Your customer relationship.**

- **Complete curriculum library** — 20+ years of refined modules covering saving, spending, debt, digital finance, investing, and entrepreneurship, age-progressed from 14 to 24.
- **Modular content blocks** — short, mobile-first lessons for in-app integration. Drop them into onboarding, savings flows, or as standalone content.
- **Outcome measurement built in** — pre/post assessment data flows back to you, to report engagement and behavioural change to your board, regulator, and ESG team.
- **Annual licence + per-user fees** — predictable cost structure that scales with adoption.

WHY THIS MOVES YOUR NUMBERS

Acquisition. Schools, parents, and youth advocates trust the AflaThrive brand. A bank that offers AflaThrive-certified financial education becomes the credible choice in a category where every product looks the same.

Engagement. Independent studies show our programmes drive measurable behaviour change — the same content that changes behaviour drives the in-app engagement your product team is trying to lift.

Retention. Customers who complete our programme are 40% more likely to open savings accounts and hold 3× more funds. The product becomes sticky because it's actually useful.

Regulator & ESG narrative. Demonstrable, third-party-validated financial literacy delivery — a story your compliance and sustainability teams can't currently tell.

WHY AFLATHRIVE

- **World Bank validated.** An independent randomised controlled trial confirms measurable behaviour change among participants.
- **Proven outcomes.** Programme completers are 40% more likely to open savings accounts and hold 3× more funds (Lloyds Bank study).
- **Deployed in 112 countries.** Refined across 400+ partner organisations and 50 languages.
- **20+ years of curriculum development.** Not a content product — a refined methodology with two decades of evidence behind it.

WHAT THE PARTNERSHIP LOOKS LIKE

Year 1 typical engagement:

- White-label content integration into your youth banking app or programme
- Onboarding, training, and integration support from our team
- Outcome dashboard with engagement and behaviour-change metrics
- Co-marketing collateral if you want to surface the partnership externally

Pricing structure: Annual licence fee + per-active-user fee. Full pricing shared on a discovery call after scoping your user base.

WHAT YOU GET, IN ONE LIST

- Complete white-label curriculum, adapted to your market & regulatory context
- Modular content blocks ready for in-app integration
- Outcome measurement infrastructure and dashboards
- Marketing & communications collateral (co-branded or fully under your brand)
- Ongoing programme support and content refreshes
- Regulatory and ESG reporting templates
